CAMagic® PhoneLink™ Firmware Library

Embedded phone connection solution for handsfree devices
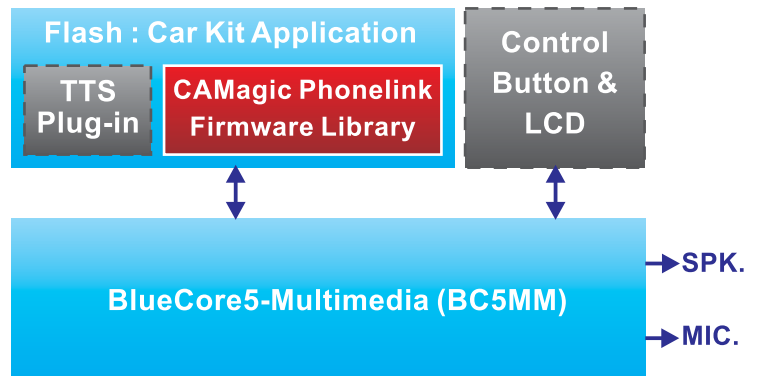

• **One click to sync the whole Phonebook, Call History, SMS, and search contacts**

• **Supports wide range of popular mobile phones**

• **Best interoperability with most desired phone features**

CAMagic PhoneLink Firmware Library works with CSR *Bluetooth*® chipsets,it provides a cost-effective **phonebook transfer** solution for car kits. Now you can add phonebook functionality without costly hardware design changes. A&W's firmware library can be easily integrated into the existing firmware for an additional phone model support.

In addition to phonebook retrieval, CAMagic PhoneLink Firmware Library **transfers received calls, missed calls, dialed calls, and SMS** as well. It helps to bring out the best performance in car kit, with a solution that is suitable for both beforemarket and aftermarket modifications.
